

## Internet Explorer

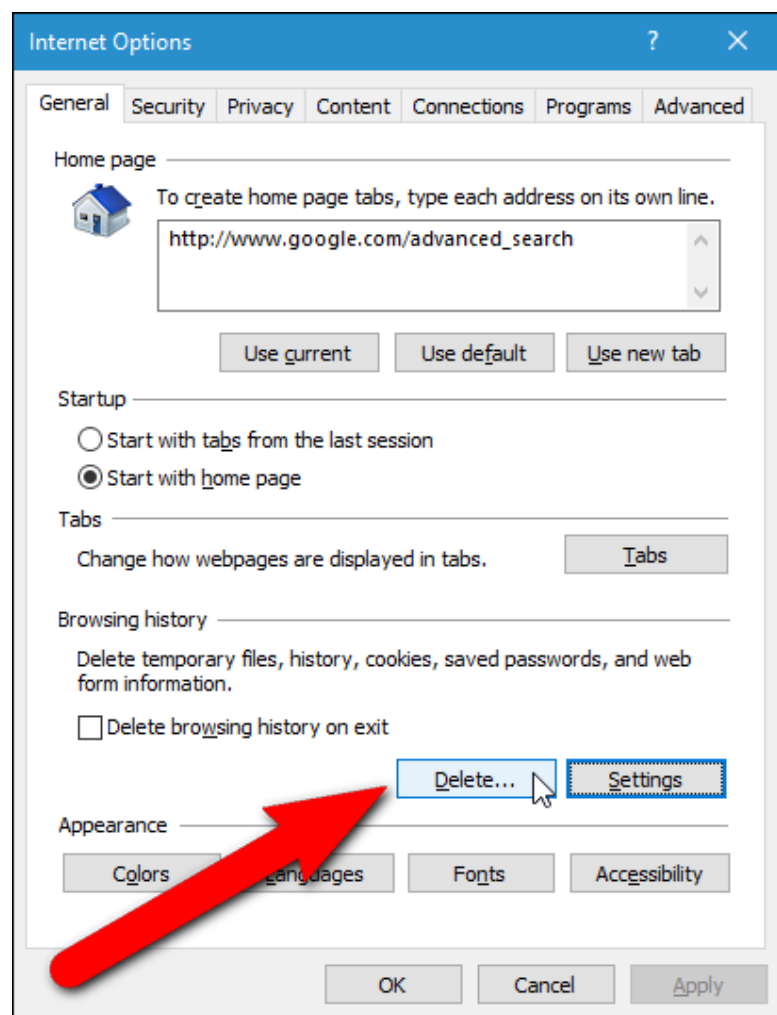

Step 1: To manage cookies in Internet Explorer, click the gear button in the upper-right corner of the browser window and select “Internet options” from the drop-down menu.

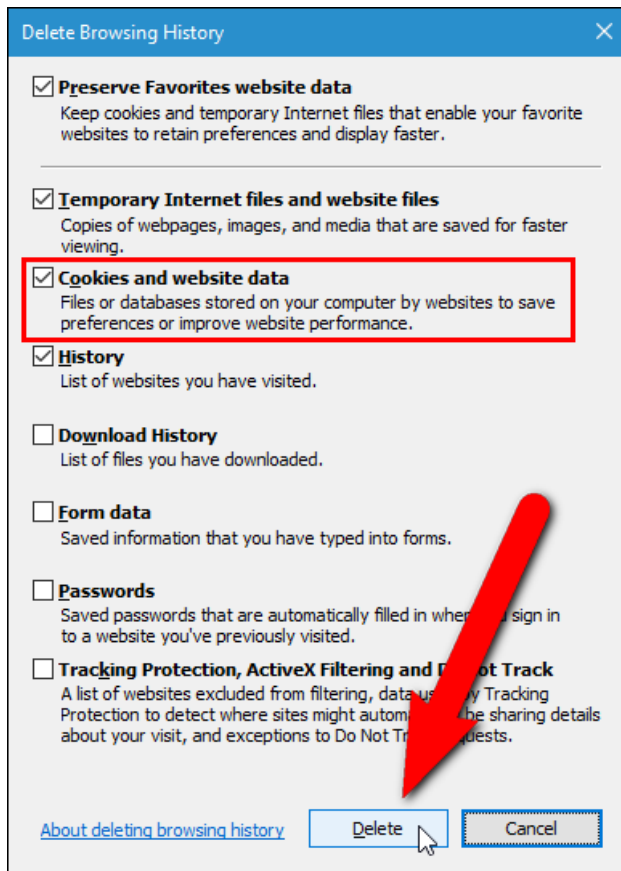

Step 2: To delete all your cookies, first close the Website Data Settings dialog box by clicking either “OK” or “Cancel”.

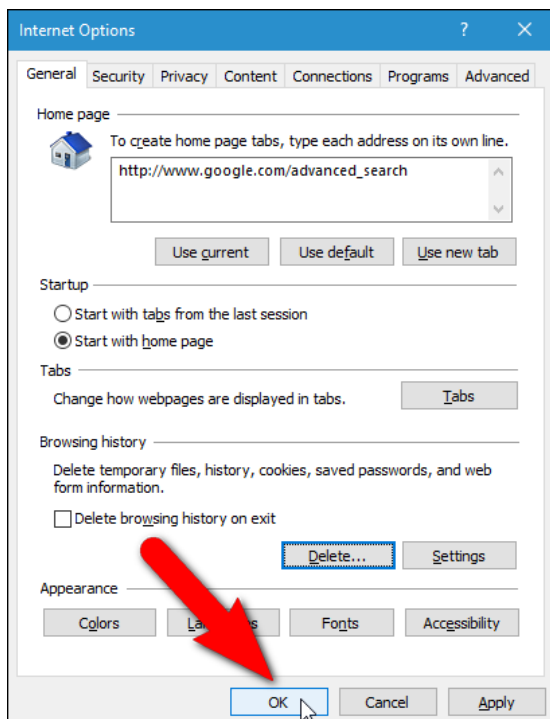

Step 3: This brings you back to the Internet Options dialog box. Click “Delete” in the Browsing history section.

Step 4: To delete all the cookies and website data, check the “Cookies and website data” check box on the Delete Browsing History dialog box. Select any other desired options and click “Delete” to remove the selected items.

Step 5: You are returned to the Internet Options dialog box. Click “OK” to close it.

Step 6: A popup message displays at the bottom of the IE window telling you that the selected browsing history has been deleted. There's an "X" button on the far right of the popup window you can click to close the message.
