# Google Chrome

Step 1: To manage cookies in Chrome, click the Chrome menu button (three horizontal bars) and select "Settings" from the drop-down menu.

Step 2: If you know you want to delete all cookies and website data, not individually, there's a quick way to do this. On the Settings tab, click "Clear browsing data" under Privacy.

Step 3: On the Clear browsing data dialog box, make sure the "Cookies and other site and plugin data" box is checked. You can also specify a time frame for which you want to delete the cookies from the drop-down list at the top of the dialog box. You can select from the past hour, the past day, the past week, the last 4 weeks, or the beginning of time. Once you're ready to delete all your cookies, click "Clear browsing data".
